## Subject index

- Accidents, Mayak, nuclear workers, personnel, poisoning, traumata, mortality, 33
- Acute radiation disease, Mayak, nuclear workers, chronic radiation disease, cancer, health effects, 9
- anabaenopsis milleri*, bloom, hepatotoxins, cyanobacteria, microcystin, 163
- Aquatic mosses, sediments, heavy metals, river pollution, factor analysis, 143
- Beech, interception, throughfall, stemflow, rainfall, chemical, forest, 127
- Birth rate, Techa population, pregnancy outcome, fetus loss, development defects, neonatal mortality, 91
- Bivalve heavy metals, natural tissue concentration, copper, cadmium, iron, 207
- Bloom, *anabaenopsis milleri*, hepatotoxins, cyanobacteria, microcystin, 163
- Bremssrahlung, Techa population, strontium-90, whole-body counter, 37
- Building materials, natural radioactivity, 171
- Cadmium, natural tissue concentration, Bivalve heavy metals, copper, iron, 207
- Cancer, Mayak, nuclear workers, acute radiation disease, chronic radiation disease, health effects, 9
- Cancer, Mayak population, radiation, chemicals, congenital anomalies, respiratory diseases, 105
- Cancer mortality, Techa population, radiation risk, leukemia, solid cancers, 73
- Cancer risk, general population, plutonium, 101
- Cardiovascular diseases, Mayak, nuclear workers, registry of personnel, mortality, 29
- Chemical, interception, throughfall, stemflow, rainfall, beech, forest, 127
- Chemicals, Mayak population, radiation, congenital anomalies, respiratory diseases, cancer, 105
- Children, occupational gamma exposure, genetic effects, grandchildren, health status, 111
- Chronic radiation disease, Mayak, nuclear workers, acute radiation disease, cancer, health effects, 9
- Congenital anomalies, Mayak population, radiation, chemicals, respiratory diseases, cancer, 105
- Copper, natural tissue concentration, Bivalve heavy metals, cadmium, iron, 207
- Cyanobacteria, *anabaenopsis milleri*, bloom, hepatotoxins, microcystin, 163
- Cytochrome, *mullus barbatus*, polychlorinated biphenyl, polycyclic aromatic hydrocarbons, enzyme, organic pollution, ethoxyresorfin-O-deethylase, mixed function oxidase, 213
- DDT, organization pesticides, pesticide residues, sediment pollution, environmental pollution, 221
- Dehydrogenase, soil, sludge, microbiol biomass, 157
- Dental amalgam, mercury, multiple sclerosis, T lymphocytes, red blood cell, IgG, 191
- Development defects, Techa population, pregnancy outcome, fetus loss, birth rate, neonatal mortality, 91
- Dietary intake, Techa population, strontium-90, metabolic model, retention function, whole-body measurements, tooth measurements, 63
- Dosimetry, Techa population, strontium, radioactive contamination, external exposure, internal exposure, 49
- Environmental pollution, organization pesticides, DDT, pesticide residues, sediment pollution, 221
- Enzyme, *mullus barbatus*, polychlorinated biphenyl, polycyclic aromatic hydrocarbons, cytochrome, organic pollution, ethoxyresorfin-O-deethylase, mixed function oxidase, 213
- Ethoxyresorfin-O-deethylase, *mullus barbatus*, polychlorinated biphenyl, polycyclic aromatic hydrocarbons, cytochrome, enzyme, organic pollution, mixed function oxidase, 213
- External exposure, Techa population, strontium, radioactive contamination, internal exposure, dosimetry, 49
- Factor analysis, sediments, aquatic mosses, heavy metals, river pollution, 143
- Fetus loss, Techa population, pregnancy outcome, birth rate, development defects, neonatal mortality, 91
- Forest, interception, throughfall, stemflow, rainfall, chemical, beech, 127
- General population, plutonium, cancer risk, 101
- Genetic effects, occupational gamma exposure, children, grandchildren, health status, 111
- Grandchildren, occupational gamma exposure, genetic effects, children, health status, 111
- Health effects, Kyshtym accident, irradiation, long-term effects, radioactive trace, 119
- Health effects, Mayak, nuclear workers, acute radiation disease, chronic radiation disease, cancer, 9

- Health effects, Mayak, Techa, Kyshtym, radioactive wastes, radioactive contaminations, 1
- Health effects registry, Mayak, nuclear workers, leukemias, occupational exposures, 19
- Health status, occupational gamma exposure, genetic effects, children, grandchildren, 111
- Heavy metals, sediments, aquatic mosses, river pollution, factor analysis, 143
- Hepatotoxins, *anabaenopsis milleri*, bloom, cyanobacteria, microcystin, 163
- HOMO, QSAR, Microtox, nitrobenzene derivatives, molecular orbitals, LUMO, 179
- IgG, mercury, multiple sclerosis, dental amalgam, T lymphocytes, red blood cell, 191
- Interception, throughfall, stemflow, rainfall, chemical, beech, forest, 127
- Internal exposure, Techa population, strontium, radioactive contamination, external exposure, dosimetry, 49
- Iron, natural tissue concentration, Bivalve heavy metals, copper, cadmium, 207
- Irradiation, Kyshtym accident, long-term effects, radioactive trace, health effects, 119
- Kyshtym, Mayak, Techa, radioactive wastes, radioactive contaminations, health effects, 1
- Kyshtym accident, irradiation, long-term effects, radioactive trace, health effects, 119
- Leukemia, Techa population, radiation risk, cancer mortality, solid cancers, 73
- Leukemias, Mayak, nuclear workers, occupational exposures, health effects registry, 19
- Long-term effects, Kyshtym accident, irradiation, radioactive trace, health effects, 119
- LUMO, QSAR, Microtox, nitrobenzene derivatives, molecular orbitals, HOMO, 179
- Lung cancer, Mayak, nuclear workers, risk estimates, occupational exposures, 25
- Mayak, nuclear workers, acute radiation disease, chronic radiation disease, cancer, health effects, 9
- Mayak, nuclear workers, leukemias, occupational exposures, health effects registry, 19
- Mayak, nuclear workers, lung cancer, risk estimates, occupational exposures, 25
- Mayak, nuclear workers, personnel, accidents, poisoning, traumata, mortality, 33
- Mayak, nuclear workers, registry of personnel, cardiovascular diseases, mortality, 29
- Mayak, Techa, Kyshtym, radioactive wastes, radioactive contaminations, health effects, 1
- Mayak population, radiation, chemicals, congenital anomalies, respiratory diseases, cancer, 105
- Mercury, multiple sclerosis, dental amalgam, T lymphocytes, red blood cell, IgG, 191
- Metabolic model, Techa population, strontium-90, dietary intake, retention function, whole-body measurements, tooth measurements, 63
- Microbiol biomass, dehydrogenase, soil, sludge, 157
- Microcystin, *anabaenopsis milleri*, bloom, hepatotoxins, cyanobacteria, 163
- Microtox, QSAR, nitrobenzene derivatives, molecular orbitals, HOMO, LUMO, 179
- Mixed function oxidase, *mullus barbatus*, polychlorinated biphenyl, polycyclic aromatic hydrocarbons, cytochrome, enzyme, organic pollution, ethoxyresorfin-O-deethylase, 213
- Molecular orbitals, QSAR, Microtox, nitrobenzene derivatives, HOMO, LUMO, 179
- Mortality, Mayak, nuclear workers, personnel, accidents, poisoning, traumata, 33
- Mortality, Mayak, nuclear workers, registry of personnel, cardiovascular diseases, 29
- Mullus barbatus*, polychlorinated biphenyl, polycyclic aromatic hydrocarbons, cytochrome, enzyme, organic pollution, ethoxyresorfin-O-deethylase, mixed function oxidase, 213
- Multiple sclerosis, mercury, dental amalgam, T lymphocytes, red blood cell, IgG, 191
- Natural radioactivity, building materials, 171
- Natural tissue concentration, Bivalve heavy metals, copper, cadmium, iron, 207
- Neonatal mortality, Techa population, pregnancy outcome, fetus loss, birth rate, development defects, 91
- Nitrobenzene derivatives, QSAR, Microtox, molecular orbitals, HOMO, LUMO, 179
- Nuclear workers, Mayak, acute radiation disease, chronic radiation disease, cancer, health effects, 9
- Nuclear workers, Mayak, leukemias, occupational exposures, health effects registry, 19
- Nuclear workers, Mayak, lung cancer, risk estimates, occupational exposures, 25
- Nuclear workers, Mayak, personnel, accidents, poisoning, traumata, mortality, 33
- Nuclear workers, Mayak, registry of personnel, cardiovascular diseases, mortality, 29
- Occupational gamma exposure, genetic effects, children, grandchildren, health status, 111
- Occupational exposures, Mayak, nuclear workers, leukemias, health effects registry, 19
- Occupational exposures, Mayak, nuclear workers, lung cancer, risk estimates, 25
- Organic pollution, *mullus barbatus*, polychlorinated biphenyl, polycyclic aromatic hydrocarbons, cytochrome, enzyme, ethoxyresorfin-O-deethylase, mixed function oxidase, 213
- Organization pesticides, DDT, pesticide residues, sediment pollution, environmental pollution, 221
- Personnel, Mayak, nuclear workers, accidents, poisoning, traumata, mortality, 33
- Pesticide residues, organization pesticides, DDT, sediment pollution, environmental pollution, 221
- Plutonium, general population, cancer risk, 101

- Poisoning, Mayak, nuclear workers, personnel, accidents, traumata, mortality, 33
- Polychlorinated biphenyl, *mullus barbatus*, polycyclic aromatic hydrocarbons, cytochrome, enzyme, organic pollution, ethoxyresorfin-O-deethylase, mixed function oxidase, 213
- Polycyclic aromatic hydrocarbons, *mullus barbatus*, polychlorinated biphenyl, cytochrome, enzyme, organic pollution, ethoxyresorfin-O-deethylase, mixed function oxidase, 213
- Pregnancy outcome, Techa population, fetus loss, birth rate, development defects, neonatal mortality, 91
- QSAR, Microtox, nitrobenzene derivatives, molecular orbitals, HOMO, LUMO, 179
- Radiation, Mayak population, chemicals, congenital anomalies, respiratory diseases, cancer, 105
- Radiation risk, Techa population, cancer mortality, leukemia, solid cancers, 73
- Radioactive contamination, Techa population, strontium, external exposure, internal exposure, dosimetry, 49
- Radioactive contaminations, Mayak, Techa, Kyshtym, radioactive wastes, health effects, 1
- Radioactive trace, Kyshtym accident, irradiation, long-term effects, health effects, 119
- Radioactive wastes, Mayak, Techa, Kyshtym, radioactive contaminations, health effects, 1
- Rainfall, interception, throughfall, stemflow, chemical, beech, forest, 127
- Red blood cell, mercury, multiple sclerosis, dental amalgam, T lymphocytes, IgG, 191
- Registry of personnel, Mayak, nuclear workers, cardiovascular diseases, mortality, 29
- Respiratory diseases, Mayak population, radiation, chemicals, congenital anomalies, cancer, 105
- Retention function, Techa population, strontium-90, dietary intake, metabolic model, whole-body measurements, tooth measurements, 63
- Risk estimates, Mayak, nuclear workers, lung cancer, occupational exposures, 25
- River pollution, sediments, aquatic mosses, heavy metals, factor analysis, 143
- Sediment pollution, organization pesticides, DDT, pesticide residues, environmental pollution, 221
- Sediments, aquatic mosses, heavy metals, river pollution, factor analysis, 143
- Sludge, dehydrogenase, soil, microbiol biomass, 157
- Soil, dehydrogenase, sludge, microbiol biomass, 157
- Solid cancers, Techa population, radiation risk, cancer mortality, leukemia, 73
- Stemflow, interception, throughfall, rainfall, chemical, beech, forest, 127
- Strontium, Techa population, radioactive contamination, external exposure, internal exposure, dosimetry, 49
- Strontium-90, Techa population, dietary intake, metabolic model, retention function, whole-body measurements, tooth measurements, 63
- Strontium-90, Techa population, whole-body counter, Bremsstrahlung, 37
- T lymphocytes, mercury, multiple sclerosis, dental amalgam, red blood cell, IgG, 191
- Techa, Mayak, Kyshtym, radioactive wastes, radioactive contaminations, health effects, 1
- Techa population, pregnancy outcome, fetus loss, birth rate, development defects, neonatal mortality, 91
- Techa population, radiation risk, cancer mortality, leukemia, solid cancers, 73
- Techa population, strontium, radioactive contamination, external exposure, internal exposure, dosimetry, 49
- Techa population, strontium-90, dietary intake, metabolic model, retention function, whole-body measurements, tooth measurements, 63
- Techa population, strontium-90, whole-body counter, Bremsstrahlung, 37
- Throughfall, interception, stemflow, rainfall, chemical, beech, forest, 127
- Tooth measurements, Techa population, strontium-90, dietary intake, metabolic model, retention function, whole-body measurements, 63
- Traumata, Mayak, nuclear workers, personnel, accidents, poisoning, mortality, 33
- Whole-body counter, Techa population, strontium-90, Bremsstrahlung, 37
- Whole-body measurements, Techa population, strontium-90, dietary intake, metabolic model, retention function, tooth measurements, 63
